

Sahil Kashyap

• (123) 456-7890

Education: Dr. B.R. Ambedkar National Institute of Technology Jalandhar

Bachelor of Technology | Electronics & Communication Engineering | CGPA 7.27/10

Professional experience

Amazon, Bangalore QAE2 March 2025 - Current

- Test Architecture & Automation:** Developed a high-impact Python/Appium automation framework for the Alexa app across 9+ critical workflows (Setup, OTA, CLI, Admin Directives, Logs/Metrics, GUI, Flashing, Tooling, OTW), successfully reducing regression test cycles by **50%+** (from 2 weeks to under a week).
- E2E Release Ownership:** Steered end-to-end quality and validation strategy for a major Matter-based Smart Bulb SDK launch; defined universal test scenarios and spearheaded cross-functional alignments across functional, integration, interoperability, and release-readiness phases.
- AI & Engineering Innovations:** Integrated AI tools to accelerate test engineering productivity, establishing custom AI workflows to generate comprehensive test scenarios, automate repetitive regression workflows, and accurately root-cause test execution failures.
- Technical Leadership & Quality Gatekeeping:** Anchored cross-functional bug triages, live debugging sessions, code reviews, and design reviews; proactively mitigated engineering risks and influenced architecture decisions to lock down release quality.
- Performance Engineering:** Designed and scaled REST API automation and performance profiling frameworks via JMeter; successfully mapped latency bottlenecks and optimized P99 response times down from >1 second.
- AI/LLM Testing:** Developed a POC for LLM-based testing using Python, DeepEval, Ollama (Qwen3:8B) to evaluate AI agent tool-calling accuracy, execution trajectories, response correctness, and hallucinations.

100ms, Abu Dhabi SDET4 May 2022 – Dec 2024

- Team Leadership & Scale:** Managed a team of automation engineers in architecting scalable Web and API test automation frameworks, driving a **40% reduction** in manual testing overhead while expanding comprehensive test coverage.
- Compatibility Frameworks:** Engineered a comprehensive Java-based Cross-Browser Automation matrix to discover critical version-specific defects and establish baseline matrix protocols
Reference: <https://100mslive.github.io/supported-browsers-platforms/>
- CI/CD & Release Engineering:** Integrated automated Web and API test suites into **CI/CD pipelines**, establishing automated quality gates and release validation to reduce post-release defects and improve deployment reliability.
- Quality Culture:** Established organizational dogfooding frameworks, lifting absolute product quality metrics by **20%** while cultivating a culture of shared engineering accountability for quality assurance.

Disney+ Hotstar, Gurugram Software Development Engineer Test II Dec 2019 – May 2022

- Scale & Efficiency Engineering:** Architected an automated media playability validation framework using Playwright to evaluate **5,000+ core content assets**.
- CI/CD & Test Automation:** Integrated automated test execution into **CI/CD pipelines using GitHub Actions and Docker**, enabling consistent, containerized test environments and automated validation as part of the release workflow.
- Execution & Reporting:** Configured **GitHub Actions execution workflows** with automated test results and execution summaries delivered to **Slack**, providing real-time visibility into test health and release validation.

OLX India Private Limited, Gurugram Software Engineer in Test II Jul 2017 – Dec 2019

- API Test Architecture:** Led the design and implementation of a scalable REST API automation framework leveraging Rest Assured, TestNG, and Java.
- Quality & Coverage Excellence:** Maintained **100% API endpoint coverage** across critical backend microservices, systematically eliminating regression escapes.
- CI/CD Integration:** Pioneered automated release sign-off mechanisms within the deployment pipeline, significantly reducing manual gating and human error during production pushes.

Snapdeal, Gurugram Software Engineer in Test II Aug 2016 – Jul 2017

- Manual Testing, API Testing, Contributed to the in-house API automation framework in Java.

Tech Mahindra, Chandigarh Software Engineer Jun 2014 – Aug 2016

SKILLS

Frameworks/Tools:

- Core Languages:** Java, Python, JavaScript
- Automation Frameworks:** Playwright, Appium, Selenium, Rest Assured, TestNG, Pytest, CI/CD, Docker
- Performance & Testing:** JMeter, API Testing, UI Automation, Firmware Testing, LLM/AI Testing, Langchain
- Advanced Specializations:** AI-Assisted Test Engineering, Test Strategy, E2E Release Ownership

Languages: English, Hindi, Punjabi
